

Classification and specification

Section 31 and 32 of the Trade Marks Act 2002

This document provides guidelines on sections 31 and 32 of the Trade Marks Act 2002, which concern the classification of goods and services and the breadth of a specification. These Guidelines do not constrain the judgment and discretion of the Commissioner of Trade Marks, and each application will be considered on its own merits.

1. Introduction

Section 31 of the Trade Marks Act 2002 (“the Act”) is concerned with the classification of goods and services.

Under section 31(1) of the Act, the goods and services in respect of which registration is desired must be classified according to the edition of the Nice Classification in effect at the time of application for registration of the trade mark.

Any question arising as to the class or classes within which the goods or services fall will be decided by the Commissioner¹.

Section 32(1) of the Act allows a single application to be filed in either one class or more than one class.

Section 32(2) of the Act is concerned with the breadth of the specification of goods and services, and is virtually identical to section 20 of the Trade Marks Act 1953.

2. Classification of goods and services

Section 31(1) of the Act states:

Goods and services must be classified, for the purpose of registration of a trade mark, according to the edition of the Nice Classification in effect at the time of application for registration of the trade mark.

New Zealand uses the Nice Classification system², an international classification system that comprises 45 classes. This system groups together similar goods or services. The classification system is set out in detail in the International Classification of Goods and Services (Nice Classification) published by the World Intellectual Property Office (WIPO).

The current edition is the Eleventh Edition of the Nice Classification which came into force on 1 January 2017 under the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of Registration of Marks³. Part 1 contains two alphabetical lists, one for goods and the other for services. Part 2 lists the goods and services in class order.

The international classification system was established in order to enable efficient searches for conflicting trade marks worldwide. The system is of benefit to Office staff, but also benefits outside users who wish to check whether there are registered marks in use that conflict with marks they are using or propose to use.

Goods and services are divided into 45 classes. Classes 1 to 34 pertain to goods and classes 35 to 45 pertain to services.

Changes are made to the international classification of goods and services from time to time. These changes are incorporated in new editions of the Nice Classification. Changes to the international classification are proposed by the Preparatory Working Group and confirmed by the WIPO Committee of Experts. Major changes are avoided wherever possible, but may be necessary to remove anomalies and inconsistencies and to make improvements with new entries.

2.1 Classification system

Under earlier legislation, the different editions of the Nice Classification were incorporated into the Schedules to the Trade Mark Regulations 1954. However, as the Schedules are no longer in force, all references to the Schedules to the Trade Mark Regulations 1954 have been amended.

The IPONZ database and the journal now record the previous Schedule and Classification Systems as follows:

- Schedule 4 (bases of Fourth Edition of Nice Classification is referred to as Nice Classification Schedule 4)
- The Eighth Edition of the Nice Classification is referred to as Nice Classification Schedule 8
- The Ninth Edition of the Nice Classification is referred to as Nice Classification Schedule 9
- The Tenth Edition of the Nice classification is referred to as Classification Schedule 10
- The Eleventh Edition of the Nice Classification is referred to as Nice Classification Schedule 11

The Ninth Edition of the Nice Classification came into force on 1 January 2007⁴. The main changes to the Nice Classification as a result of the introduction of the Ninth Edition are set out in [Appendix 1](#).

The Tenth Edition of the Nice classification came into force on 1 January 2012. The main changes to the Nice Classification as a result of the introduction of the Tenth Edition are set out in [Appendix 2](#).

The Eleventh Edition of the Nice Classification came into force on 1 January 2017. The main changes to the Nice Classification as a result of the introduction of the Eleventh Edition are set out in Appendix 3.

New versions of the current edition are released annually on 1 January. These changes are minor and our guidelines and databases are updated to reflect the modifications. Details on the specific changes can be found online at the [World Intellectual Property Organisation \(WIPO\) website](#) as they are released.

2.2 Importance of classification

The specification of a trade mark is important both before and after registration.

While an application is still pending, it is in relation to its goods or services that a mark is tested for distinctive character (section 18), misleading reference and offensiveness (section 17) and confusing similarity to other trade marks (section 25). In encouraging applicants to make the specification precise, and by ensuring that the goods and services are classified correctly, examiners lay the groundwork for sound decisions in these areas. If an application has been registered in the wrong class, later searches may not find it and IPONZ may then inadvertently register two conflicting marks.

Once a mark is registered, the scope of the applicant's rights in the mark is defined and limited by the scope of the specification⁵.

The owner of a registered trade mark may need to take legal action against infringement by another trader. One of the key questions in such an action is whether the mark complained of is being used for the same or similar goods or services as those of the registered mark.

It is vital therefore that the Court and all concerned are clear about what goods or services the registration covers. Applicants with registrations that are not clearly defined may have difficulty defending their rights, as the court may deem that their registrations do not cover the goods or services the applicants believed they had protection for.

2.3 Classification resources

WIPO publishes the current classification schedule, with class headings, general remarks and explanatory notes online.

WIPO, the UK Patent Office and the United States Patent and Trademark Office have online databases containing a list of goods and services. Although some of the items in these databases appear in the Nice Classification lists, others are not specifically mentioned there. The databases may thus be of assistance in determining the correct classification of goods or services that are not listed in the Nice Classification books.

[View the United States Patent and Trademark Office classification database.](#)

The Classification Annexure, which is annexed to these Guidelines, should also be referred to as it lists a number of common classification issues.

3. Classification examination

We will examine the application to ensure the goods and services are clear and have been correctly classified. When examining a specification of goods or services, an examiner must consider four things:

- Whether the nature of the goods and services is clear (section 31)
- Whether the goods and services are correctly classified in the class or classes applied for (section 31)
- Whether the specification contains a registered trade mark or the applicant's own mark
- Whether the applicant has applied for an unreasonably wide range of goods and/or services (section 32(2)).

3.1 Clear specification

It is the responsibility of applicants or their agents to submit specifications that clearly set out the goods and/or services the applicants wish to cover in their applications.

If an examiner is unsure about the meaning of a particular item, the examiner should ask the applicant for either an explanation or an amendment to the specification.

3.1.1 Acronyms and abbreviations

Acronyms and abbreviations are generally acceptable in a specification providing they are well known, for example, VCR or CD-ROM. Unusual terms are acceptable if they are common in the particular trade, known to the examiner, or if the applicant has provided an explanation that can thereafter be viewed by outside parties.

3.1.2 Punctuation, spelling tautology and formatting

Where the specification is unclear due to poor punctuation, examiners should ask the applicant to correct this⁶. The examiner may suggest appropriate alternative punctuation.

Examiners will correct any obvious spelling errors, including adding spaces where required, but should ask the applicant where the spelling error is not obvious.

However, where the wording of the specification is unclear, then the examiner will request more information from the applicant, or alternatively, suggest appropriate alternative wording or punctuation.

In addition to the points noted above, IPONZ applies standardised formatting to trade mark specifications of goods and services in line with current international best practice.

- Specifications should take the form of a single sentence commencing with a capital letter and ending in a full stop;
- The body of the specification should be in lower case, except for acronyms and proper nouns;
- Goods and services in the specification should be separated by semicolons or commas instead of listed on separate lines;

- Double spaces are removed

To help applicants comply with the standardised format, our website incorporates an automatic reformatting function in the online trade mark application form.

Applicants retain the ability to file specifications in the format they choose, however, the examination team may reformat specifications so that they comply with the formatting standards of IPONZ. The reformatting of specifications will not change the scope or nature of the specification.

3.2 Correct classification

The onus is on an Applicant to ensure that goods and/or services are filed in the correct class or classes⁷, and to submit a specification that clearly sets out the goods or services the applicant wishes to cover. However, it is the responsibility of the Examiner to check whether the goods or services applied for have been correctly classified.

The following resources should be checked by the examiner in this order:

- Nice Classification, Parts 1 and 2.
- General Remarks and Explanatory Notes sections of the Nice Classification books.
- Classification Annexure: Common Classification Issues.

Where a trade mark applicant has previous registrations in respect of an incorrect specification, this does not justify allowing the later application to proceed with a similarly incorrect specification. If an error has occurred, it should not be perpetuated. In some instances the registered specification will have been correct as at the date of application, as international classification standards can change over time. It is important that the goods or services applied for are correctly classified in light of current international classification standards. Although consistency is desirable, prior registrations in respect of a particular specification are not binding on IPONZ.

If the correct classification cannot be determined on the information currently available, the examiner should write to the applicant requesting further details.

The Examiner may defer examination where:

1. some of the listed goods/services fall within classes additional to those that have been nominated and paid for; or
2. no class was indicated on the application, and the listed goods/services fall within a greater number of classes than has been paid for.

Where an Applicant explicitly lists goods or services which are incorrectly classified, the Examiner should bring this to the Applicant's attention in the Compliance Report. In this situation, the examiner should give the Applicant the opportunity to either:

- Delete the incorrectly classified goods or services from the application;
- Transfer the incorrectly classified goods or services to the correct class where the other class exists in the application; or

- Add an additional class or additional classes to the application in which the goods or services in question are correctly classified⁸.

Where the Examiner does not raise a classification concern in the initial Compliance Report and the applicant is aware that the application contains incorrectly classified goods or services, the applicant may still apply to the Commissioner to delete or transfer the incorrectly classified goods or services or add a class or classes to the application pertaining to those incorrectly classified goods or services.

3.2.1 Transfer

Where there are incorrectly classified goods or services in a multi-class application, an applicant may transfer⁹ items from one class to another.

Example

The applicant files a multiclass application in classes 39 and 43. The application includes “travel agency services and accommodation reservations” in the class 39 specification, although “accommodation reservations” fall in class 43. The examiner will ask the applicant to transfer “accommodation reservations” to the class 43 specification.

An applicant may also transfer incorrectly classified goods or services between different applications, where the trade mark applications:

- are for the same trade mark(s); and
- have the same filing dates and, where applicable, the same convention priority dates; and
- are in the name of the same applicant; and
- are classified according to the same classification system.

Where the transfer of incorrectly classified goods or services is from an application that is still at examination status to an application that has been accepted, the transfer may still be made; however, the whole application will be re-advertised.

Where the transfer of incorrectly classified goods or services is from an application that is still at examination status into the specification of a registered trade mark, the transfer may still be made; however, the part of the specification which has not been advertised will be advertised before it is merged with the registered trade mark.

3.2.2 Adding a class

Where there are incorrectly classified goods or services, the applicant may apply to the Commissioner to add additional classes to an application until the time the application is accepted¹⁰. The addition of classes cannot broaden the scope of the original application, and such an addition will be subject to an additional application fee(s)¹¹.

For more information on adding a class or classes to an application, see the [Practice Guidelines on Adding a Class to an Application](#).

3.3 Classification in other classes

Some goods and services appear in more than one class in the international classification system. For example, beverages may be classified in classes 5, 29, 30, 32 and 33, and building materials may be classified in classes 6, 17 and 19.

Care must be taken when a generic item appears in one class, and a more specific item appears in another. The specific item overrides the general item. The general item is often marked with an asterisk in the Nice Classification to indicate that those goods or services are also classified in other classes.

Example

Shoes are classified in class 25, and marked with an asterisk. Orthopaedic shoes are specifically classified in class 10, and shoes for protection against accidents, irradiation and fire are specifically classified in class 9.

In the past, applicants were required to add “all being goods/services in this class” (or similar wording) to satisfy IPONZ that the goods or services had been correctly classified. It is no longer necessary to qualify specifications in this way. The onus is on the applicant to ensure that the application is filed in the correct class, and to submit a specification that clearly sets out the goods or services the applicant wishes to cover. The examiner should check the specification and draw any errors to the attention of the applicant. However, as long as the goods or services applied for can fall under the class applied in, the examiner will assume that the applicant has applied in the correct class.

Using the example given above, an applicant who applies for shoes in class 10 will be assumed to be applying for orthopaedic shoes.

3.4 Specifications with registered marks

A registered trade mark¹³ or an applicant’s own mark must not appear in a specification. The presence of a word on the Register should be taken as evidence that the word is not generic for the goods or services specified. Where any of these marks or any other trade marks appear in a specification, the Examiner will raise a concern and ask the applicant to delete the mark from the specification or to provide a generic description of the goods.

Any amendment to the specification must not have the effect of extending the goods or services claimed.

The following list sets out common examples of registered marks that often appear in applicant’s specifications and suggested alternative generic descriptions. This list is not exhaustive.

| Word | Class | Trade mark number | Possible alternative description |
|-------------|-------|-------------------|--|
| AERTEX | 25 | 2702 | clothing |
| BAND-AID | 5 | 90467 | adhesive dressing/materials |
| BATTS | 17 | 105507 | insulating materials |
| BIRO | 16 | 43017 | ball point pen |
| BLUETOOTH | 9 | 74425 | wireless communication apparatus |
| BOOGIE | 28 | 121304 | body board |
| CATERPILLAR | 7 | 29476 | machines |
| CELLOPHANE | 16 | 32954 | cellulose sheet |
| CHEERIOS | 29 | 70022 | cocktail sausages |
| DICTAPHONE | 9 | 7069 | instrument for recording and reproducing dictation |
| DISCMAN | 9 | 166607 | portable audio compact disc players |
| DOONA | 20 | 100949 | quilted eiderdowns or padded quilts |
| ELASTOPLAST | 5 | 61498 | elasticised dressing |
| ESKY | 21 | 149065 | portable cooling apparatus, ice boxes |

| Word | Class | Trade mark number | Possible alternative description |
|-------------------------|--------------------|------------------------|------------------------------------|
| FORMICA | 22 | 52144 | laminated building material |
| FRISBEE | 28 | 128313 | toy flying saucer |
| GIB | 19 | 129506 | plasterboard |
| HOOVER | 9 | 27970 | vacuum cleaner |
| JANDALS | 25 | 60683 | footwear |
| JACUZZI | 11 | 160171 | whirlpool baths |
| JEEP | 12 | 39663 | small military-style vehicle |
| LAMINEX | 1 | 52599 | adhesives |
| LYCRA | 22 | 61747 | synthetic fibres and filaments |
| PERSPEX | 17 | 38211 | heat resistant glass/plastic |
| PLASTICINE | 17 | 34664 | material for modelling |
| POST-IT | 16 | 166410 | adhesive notepaper |
| PRIMUS | 11 | 118572 | portable cooking apparatus |
| PYREX | 21 | 16072 | glassware |

| Word | Class | Trade mark number | Possible alternative description |
|-------------|-------|-------------------|--------------------------------------|
| ROLLERBLADE | 28 | 196801 | in-line skates |
| SELLOTAPE | 16 | 78227 | adhesive tape |
| THERMOS | 21 | 7084 | insulated flask |
| VASELINE | 5 | 47785 | petroleum jelly |
| VELCRO | 24 | 61932 | self-fastening synthetic fabric |
| WALKMAN | 9 | 134512 | portable audio equipment |
| WEED EATER | 7 | 111415 | grass and weed cutting machines |
| XEROX | 9 | 61928 | electro-photographic copying machine |

4. Broad specifications

Once a mark is registered, the scope of the applicant's rights in the mark is defined by the scope of the specification¹⁴. Registration of a mark with a very wide specification may cause problems for both IPONZ and subsequent applicants.

If IPONZ allows registration of a mark with a very broad specification, that mark is more likely to be raised as a citation against future applications. Future applicants may be blocked from getting registration for their own trade marks, even though the owner of the original mark is not actually using their trade mark on all the goods or services stated in the specification.

When examining a specification of goods or services, an examiner should consider whether the applicant has applied for an unrealistically broad range of goods or services.

Section 32(2) of the Act states:

The Commissioner must not register a trade mark in respect of all of the goods and services included in a class, or a large variety of goods or services, unless the specification is justified by the use or intended use of the sign.

Therefore, a concern will be raised under section 32(2) of the Act where the examiner considers the specification applied for is too broad or that it is commercially unrealistic that the applicant would use the mark in relation to that broad range of goods or services. For example an application that specified every item listed in the Nice Classification for a single class, for instance class 3 would appear to be unrealistically broad.

Where an Examiner raises concerns under section 32(2) of the Act, the applicant can usually overcome those concerns by –

1. agreeing to limit the specification of goods and services; or
2. satisfying IPONZ that they have a definite intention to trade in all of the specified goods or services applied for. For example, IPONZ will consider statutory declarations wherein the applicant shows use of the mark in relation to all of the goods and/or services claimed.

Applicants should also refer to the General Annexure and the Computer, Telecommunication and Online Goods and Services Annexure for guidance on what terms will concerns be raised under section 32(2) of the Act.

4.1 Factors to consider

When determining whether concerns should be raised under section 32(2) of the Act, examiners should consider the circumstances of the particular case. Examiners should ask: “is it commercially realistic that the mark will be used in relation to the wide range of goods and/or services specified in the application?”

In answering this question examiners should take into account the applicant themselves and the types of goods and services in which the applicant is known to trade. For example, a large company may be more likely to provide a wide range of goods or services than a smaller company. Each case must be considered on its merits, however, large companies should not automatically be granted wider rights than smaller applicants.

It may be helpful to check whether the applicant has previous registrations for a similarly wide specification. However, as stated above, each case must be considered on its merits. The fact that an applicant has a previous registration with a wide specification should not automatically be taken as justification for allowing a later application to proceed with a similarly wide specification.

4.2 Class headings

The Nice Classification class headings¹⁵ are only an indication of the goods and services that are included within a particular class.

When a class heading is used as a specification, it loses its capacity to function as a class heading and becomes part of an application or registration as a statement of goods or services. Therefore, a claim for a class heading does not equate to a claim for all the goods or services that may be in that class. An application which specifies a class heading only claims protection in respect of the goods or services actually stated in the heading, or that may be clearly encompassed by the heading.

This is particularly relevant when considering whether an amendment to overcome concerns raised under section 31 or 32(2) is acceptable, or whether an alteration or correction of error is acceptable.

Examples

The class heading for class 15 is “musical instruments”. Applicant A applies to register a mark in respect of “musical instruments”. The applicant then wishes to amend the application to “trumpets; music stands; cases for trumpets”. This would not be acceptable as “music stands” and “cases for trumpets” are not musical instruments and are not encompassed in the specification as originally filed and the amendment would constitute a broadening of the original specification.

Applicant B applies to register a mark in respect of the class heading for class 9. In order to overcome a section 32(2) concern the applicant requests that the specification be amended to “computer software for graphic design”. This would be acceptable for registration as the class heading for class 9 specifically includes computer software.

As an application which specifies a class heading claims protection only in respect of the goods/services actually stated in the heading, or may be clearly encompassed by the heading, concerns under section 32(2) of the Act will not, in the main, be raised for applications which contain specifications that are drafted in the form of the class heading.

5. Commissioner's ruling

Section 31(2) of the Act states:

Any question arising as to the class within which any goods or services fall must be determined by the Commissioner, whose decision is final.

Section 31(2) of the Act gives the Commissioner the power to decide any questions arising as to the class within which any goods or services fall.

From time to time IPONZ receives requests for a Commissioner's ruling on the correct classification of goods or services. An Assistant Commissioner deals with these requests.

6. Conversion to the current Nice edition

The owner of a trade mark registered with a specification classified under a previous Nice Classification Schedule may apply to the Commissioner for conversion of the specification to the current Nice Classification Schedule (Edition of the Nice Classification)¹⁶.

Where a person applies for conversion to the current Nice Classification Schedule, they will be required to submit the following information¹⁷:

- The name of the owner;
- The address for service;
- If the owner has an agent, the agent's name; and
- The registration number of the trade mark.

An applicant for conversion may also nominate registration in additional classes if the current registration falls into additional classes under the most recent edition of the Nice Classification¹⁸.

6.1 Notice of proposed conversion

Where the Commissioner receives an application for conversion, the Commissioner must first notify the applicant for conversion of the proposed form of the conversion¹⁹. The applicant will be sent a Notice of Proposed Conversion, advising the proposed form of the conversion. Where the applicant does not agree to the proposed conversion, the applicant has a right to a hearing on this matter.

A time limit will be stipulated, being not less than one month from the date of the Notice of Proposed Conversion, in which the applicant must indicate that it wishes to be heard before the Commissioner exercises his power to convert the application²⁰.

Appendix one - changes to the ninth edition of the Nice Classification

| New indications added | |
|-----------------------|---|
| Class | Indication |
| 1 | Chemical additives for oils Additives (Chemical –) for oils Oils (Chemical additives for –) |
| 3 | Joss sticks |

Appendix two - changes from the Ninth edition to the Tenth Edition of the Nice Classification

| New indications added | |
|-----------------------|--|
| Class | Indication |
| 1 | Biological tissue cultures other than for medical or veterinary purposes |

New indications added

| Class | Indication |
|-------|---|
| | Genes of seeds for agricultural production Stem cells other than for medical or veterinary purposes |
| 2 | Repositionable paint patches |
| 3 | Aloe vera preparations for cosmetic purposes Balms other than for medical purpose Douching preparations for personal sanitary or deodorant purposes (toiletries) Dry shampoos Drying agents for dishwashing machines Lip glosses Massage gels other than for medical purposes Breath freshening strips |
| 4 | Ethanol (fuel) |
| 5 | Aloe vera preparations for pharmaceutical purposes Diapers (babies' napkins) Pearl powder for medical purpose Babies' napkins (diapers) Reparations for reducing sexual activity |
| 6 | Arbours (structures of metal) |
| 7 | Brake pads other than for vehicles |

New indications added

| Class | Indication |
|-------|--|
| | Gas-operated blow torches Wind turbines |
| 8 | Draw wires (hand tools) Emery files Fish tapes (hand tools) Wire strippers (hand tools) |
| 9 | Cell phone straps Global positioning systems (GPS) apparatus Light-emitting diodes (LED) USB flash drives |
| 10 | Love dolls (sex dolls) Stents Body rehabilitation apparatus for medical purposes |
| 11 | Bread-making machines Hydromassage bath apparatus Light-emitting diodes (led) lighting apparatus Fabric steamers Electric appliances for making yogurt |
| 12 | Brake pads for automobiles Headlight wipers |

New indications added

| Class | Indication |
|-------|--|
| | Spare tire covers Spare tyre covers Spare wheel covers |
| 13 | Belts adapted for ammunition Hand grenades Side arms (firearms) |
| 14 | Beads for making jewelry |
| 15 | Bass drum sticks |
| 16 | Correction tapes (office requisites) Document holders (stationery) Flyers Marking pens (stationery) Trading cards other than for games |
| 18 | Pouch baby carriers |
| 19 | Porphyry (stone) Prefabricated houses (kits) |
| 20 | Baby changing platforms Interior textile window blinds |

New indications added

| Class | Indication |
|-------|--|
| | Knobs, not of metal Paper blinds Wall-mounted diaper (napkin) changing platforms Door bolts not of metal Indoor window shades (furniture) Indoor window blinds (shades) (furniture) |
| 21 | Window-boxes |
| 22 | Body bags |
| 25 | Ski gloves |
| 26 | Arm bands (clothing accessories) Beads other than for making jewelry Bobbins for retaining embroidery floss or wool (not parts of machines) |
| 27 | Textile wallpaper |
| 28 | Portable games with liquid crystal displays Arcade video game machines Ascenders (mountaineering equipment) Chips for gambling Pachinkos Poles for pole vaulting |

New indications added

| Class | Indication |
|-------|---|
| | Scale model kits (toys) Slot machines (gaming machines) Video game machines Bags especially designed for skis and surfboards |
| 29 | Ajvar (preserved peppers) Aloe vera prepared for human consumption Non-alcoholic egg nog Processed fish spawn Preserved garlic Fish mousses Vegetable mousses Processed seeds Processed sunflower seeds |
| 30 | Cheeseburgers (sandwiches) Ham glaze Noodle-based prepared meals Pesto (sauce) Fruit coulis (sauces) Cake frosting (icing) Chocolate mousse Dessert mousses (confectionery) |

New indications added

| Class | Indication |
|-------|--|
| 31 | Aloe vera plants Spinach, fresh |
| 32 | Aloe vera drinks, non-alcoholic Smoothies |
| 33 | Pre-mixed alcoholic beverages, other than beer-based |
| 35 | Telemarketing services Organization of fashion shows for promotional purposes |
| 37 | Drilling of deep oil or gas-wells |
| 38 | Transmission of digital files Transmission of greeting cards online Wireless broadcasting Transmission of greeting cards online |
| 39 | Aircraft rental Transportation logistics |
| 40 | Cryopreservation services Sandblasting services |
| 41 | Coaching (training) |

New indications added

| Class | Indication |
|-------|--|
| | Conducting fitness classes Disc jockey services Games equipment rental Personal trainer services (fitness training) Production of music Toy rental Vocational retraining Organization of fashion shows for entertainment purposes |
| 42 | Digitization of documents (scanning) Handwriting analysis (graphology) Monitoring of computer systems by remote access Provision of scientific information, advice and consultancy in relation to carbon offsetting Water analysis Quality evaluation of standing timber Quality evaluation of wool Quality evaluation of standing timber Quality valuation of standing timber Scientific laboratory services |
| 43 | Rental of drinking water dispensers Rental of cooking apparatus |

New indications added

| Class | Indication |
|-------|---|
| 44 | Aquaculture services Medical equipment rental Therapy services Tree planting for carbon offsetting purposes |
| 45 | Alternative dispute resolution services Genealogical research Planning and arranging of wedding ceremonies Rental of safes |

Existing indications deleted

| Class | Indication |
|-------|--|
